In developing the new Designer Doors range, your safety and peace of mind have been at the heart of all our design decisions. We specified the best materials and selected only the highest quality fittings to ensure that your new door provides a high level of security.

High Security

- 10-point locking for high security
- Hardened stainless steel and picking protection pins provide tamper-protection
- Upper and lower locking pins shaped conically for efficient closure
- Our laser-cut key profile system prevents the use of any unauthorized keys
- Hidden hinge protectors provide robust security against external impacts
- Horizontal key has a cross groove in the core which can only align with the 10-point spring-loaded pin pairs within the lock
- ISEO R7 cylinder, drill proof, anti-bumping and placed 60 mm away from the frame: high security and easy opening
- Adjustable hinges and lock
- 'Block door' construction incorporates a totally hidden sash and fixing system which encases the lock body, creating an additional 5mm aluminium external wall for added security
- An integrated, enclosed glazing panel prevents the need for glazing beads – which provides maximum protection against ramming and forced entry

Finishing Touches

Our unrivalled range of colour options enables you to choose the perfect shade for your house, or make a real design statement with a striking contrast. We offer a vibrant palette to enable you to opt for a unique textured finish or differing colours inside and out, and with complementary door furniture to provide that elegant finishing touch you can create a true focal point for your home.
